In re patent application of:

Lenka M. Jelinek

Serial No.: 09/812,472

Group Art Unit: 3713

Filed: March 19, 2001

Examiner: C. Saadat

FOR: TOYS, SOFTWARE AND METHODS FOR PRESENTING  
PLAY SURFACES WITH DYNAMICALLY ADJUSTABLE  
IMAGES**AMENDMENT AND RESPONSE UNDER 37 C.F.R. § 1.111**Assistant Commissioner for Patents  
Washington, DC 20231

Sir:

In response to the Office Action mailed January 22, 2003, please amend the  
above-identified application as follows:**IN THE SPECIFICATION:**Please replace the paragraph spanning page 5, line 30 - page 6, line 7 with the  
following paragraph:

A1

-- In some embodiments, the image data is generated internally. For example, toy set 600 includes a sensor 660. Sensor 660 may be placed on the back surface of side panel 610, although the invention is not limited in that regard. Sensor 660 senses the amount of illumination, and accordingly controls displays 632 and 634. In other embodiments, the image data is delivered to the display. This can be performed by any way known in the art. For example, image data may be delivered by way of coupling to a global computer network such as the internet. Many such ways will become apparent to the person skilled in the art in view of the present description, and also in view of the nature and the requirements of the display and its image data. --
